RESOURCE 2.11

Information Architecture Worksheet

STAGE 10 | INFORMATION ARCHITECTURE

PURPOSE

Organize information and functions so users can understand where they are, find what they need, and move between relevant areas.

Primary user tasks that the structure must support

Main information objects / content types

Proposed top-level areas or sections

Hierarchy: area → section → item

Navigation model and global navigation elements

Labels and terminology users will understand

Information Architecture Worksheet

STAGE 10 | INFORMATION ARCHITECTURE

CONTINUED · Record evidence, assumptions, derived conclusions, and open questions separately.

How users find, search, filter, or browse information

Relationships between related items and cross-links

What must be visible at a glance vs. available on demand?

Empty, no-results, and permission-limited states

How will you validate findability and comprehension?

Open questions and evidence / assumptions (E/H/D/O)
