MVPCompanion

Data Model Worksheet

RESOURCE 2.12

STAGE 11 | DATA

PURPOSE

Define the information the product needs to represent. Focus on entities, attributes, relationships, sources, and lifecycle—not database technology first.

Central entity and why it matters to the Core Jobs

Supporting entities / objects

Attributes for each entity: name, meaning, required/optional

Relationships: entity A → relationship → entity B

Identifiers, uniqueness, ownership, and cardinality

Derived values vs. user-entered or externally sourced data

Data Model Worksheet

STAGE 11 | DATA

CONTINUED · Record evidence, assumptions, derived conclusions, and open questions separately.

Source of each data element and who may change it

Lifecycle: create, read, update, archive, delete

Validation rules, defaults, and data quality constraints

Sensitive data, access, privacy, and retention considerations

Import/export, integrations, or migration needs

Open data questions and assumptions (E/H/D/O)
