Requirements & Acceptance Criteria Worksheet

STAGE 12 | REQUIREMENTS

PURPOSE

Translate Core Jobs and selected capabilities into clear, testable requirements. State observable behavior and completion criteria.

Requirement ID / short name

User / context / Core Job this requirement supports

Need or capability: what must the product enable?

Trigger and preconditions

Inputs and their validation

Expected system behavior and outputs

Dependencies, constraints, and failure conditions

Requirements & Acceptance Criteria Worksheet

STAGE 12 | REQUIREMENTS

CONTINUED · Record evidence, assumptions, derived conclusions, and open questions separately.

Acceptance criteria: observable, testable conditions

Negative / boundary cases that must be handled

Priority and rationale (Must Have / Should Have / Later / Not in MVP)

Traceability: Problem → User → Outcome → Job → Capability → Requirement

Verification method and evidence of completion

Unresolved questions, owner, and decision needed
