MVPCompanion

RESOURCE 2.14

Learning & Metrics Worksheet

STAGE 13 | LEARNING

PURPOSE

Plan how the MVP will reduce uncertainty. Start with a decision or learning question, then define a test and meaningful evidence.

Decision the team needs to make

Most important learning question

Hypothesis (H): if… then… because…

Current evidence (E) and confidence level

Experiment or test: audience, method, duration

What behavior or result will be observed?

Learning & Metrics Worksheet

STAGE 13 | LEARNING

CONTINUED · Record evidence, assumptions, derived conclusions, and open questions separately.

Success signal / metric and how it is calculated

Baseline, target, sample, and observation window (if known)

Guardrail metric or unintended consequence to watch

Decision rule: what result means continue, change, or stop?

How will findings change the hypothesis or product?

Owner, timing, and unresolved questions
