MVPCompanion

FROM IDEA TO MVP

Product Mental Model Canvas

Stage 5 · Product

WORKSHEET GUIDANCE

Define what the product fundamentally is before designing screens. Start with the central object and its relationships.

Central entity / object the user owns, manages, creates, or transforms

Why is this the central object?

Supporting entities / objects

Relationships between entities (A → relationship → B)

Durable objects vs temporary tasks/actions

Product Mental Model Canvas

Stage 5 · Product

WORKSHEET GUIDANCE

Define what the product fundamentally is before designing screens. Start with the central object and its relationships.

CONTINUED · E = Evidence | H = Hypothesis | D = Derived | O = Open question

Information that needs structured fields

Information that can remain free-form / unstructured

Lifecycle states, if the central object changes over time

Key user actions and resulting state changes

What is deliberately not part of the model?

Open modeling questions / assumptions
