MVPCompanion

FROM IDEA TO MVP

MVP Specification Template

Integrated output · All 15 Stages

WORKSHEET GUIDANCE

Bring the essential decisions into one coherent, traceable specification. Use additional documents for detailed requirements as needed.

1. Executive summary — what are we building and why?

2. Problem and evidence (E) / hypotheses (H)

3. Primary user, non-targets and context

4. Value proposition, outcome and differentiation

5. Product concept, central entities and lifecycle

6. Prioritized Core Jobs

MVP Specification Template

Integrated output · All 15 Stages

WORKSHEET GUIDANCE

Bring the essential decisions into one coherent, traceable specification. Use additional documents for detailed requirements as needed.

CONTINUED · E = Evidence | H = Hypothesis | D = Derived | O = Open question

7. MVP scope — Must Have / Should Have / Later / Not in MVP

8. Core user flows, first-value moment and key states

9. Information architecture / navigation

10. Data Model — entities, fields and relationships

11. Requirements — behavior, inputs, outputs and dependencies

MVP Specification Template

Integrated output · All 15 Stages

WORKSHEET GUIDANCE

Bring the essential decisions into one coherent, traceable specification. Use additional documents for detailed requirements as needed.

CONTINUED · E = Evidence | H = Hypothesis | D = Derived | O = Open question

12. Acceptance criteria — observable conditions of completion

13. Learning questions, hypotheses and success metrics

14. Technical boundaries, integrations and major risks

15. Open questions (O), decisions and owners

Traceability: Problem → User → Outcome → Job → Capability → Requirement → Acceptance Criterion → Metric

Final readiness: what is still too uncertain to build responsibly?
