MVPCompanion

RESOURCE 2.9

Context & Lifecycle Worksheet

STAGE 6 | CONTEXT & LIFECYCLE

PURPOSE

Map when, where, and under what conditions the product is used, and how the relevant user or product object changes over time.

Primary user and situation of use

Trigger: what causes the user to start?

Context: location, time, device, environment, constraints

People, roles, or systems involved

Current journey before the product is used

Lifecycle phases of the central object or user process

Context & Lifecycle Worksheet

STAGE 6 | CONTEXT & LIFECYCLE

CONTINUED · Record evidence, assumptions, derived conclusions, and open questions separately.

States and transitions: from → event/action → to

What happens when a step is delayed, interrupted, or abandoned?

Exceptional, rare, or recovery situations

Notifications, reminders, or handoffs needed (if any)

Evidence (E), hypotheses (H), derived conclusions (D), open questions (O)

What must be clarified before designing the experience?
