The MVP Experiment Planner

ONE-PAGE TEMPLATE · TURN A CRITICAL ASSUMPTION INTO A LEARNING TEST

Plan one focused experiment before building or changing the MVP. Keep the question decision-relevant, define what would support or challenge the hypothesis, and be explicit about what the experiment cannot prove.

1. PRODUCT DECISION THIS EXPERIMENT WILL INFORM

OWNER / DATE

2. CRITICAL HYPOTHESIS (SPECIFIC, CHALLENGEABLE)

3. TARGET USER / CONTEXT

4. SMALLEST USEFUL EXPERIMENT / USER JOURNEY

5. OBSERVABLE SIGNAL THAT WOULD SUPPORT IT

6. RESULT THAT WOULD CHALLENGE / WEAKEN IT

7. WHO / WHAT WILL BE OBSERVED, AND HOW?

8. LIMITATIONS / WHAT THIS TEST CANNOT PROVE

9. HOW WILL DIFFERENT RESULTS CHANGE THE DECISION?

10. AFTER THE EXPERIMENT — COMPLETE AFTER RUNNING

☐ Observed ☐ Validated / Hypothesis ☐ Not challenged
